Add network capacity without adding significant new RF coverage area

Increase the existing RF signal level in an existing coverage area

Provide new radio frequency coverage in a significant area not already served by existing radio frequency coverage by the same Owner or affiliated entity (such as a roaming agreement with an affiliated entity for a cellular or PCS carrier).

Other

5.00: **Build-Out Requirements**

5.01: Do any of the radio services identified in 3.09 above require the licensee to provide specific radio frequency/population coverage pursuant to an FCC license?
 Yes No

5.02: If the answer to 5.01 is NO proceed to 6.00.

5.03: Have all of the FCC build-out requirements as required by all licenses covering all radio services proposed at this Project been met? Yes No

5.04: If the answer to 5.03 is YES proceed to 6.00.

6.00: **Radio Frequency Coverage Maps**

6.01: Where a licensee intends to provide radio frequency geographic coverage to a defined area from the Project (including applicants in the cellular, PCS, broadcast, ESMR/SMR categories), the coverage maps and information requested below are required attachments. All others proceed to 7.00.

For the coverage maps required here, the following mandatory requirements apply:

1. The size of each submitted map must be no smaller than 8.5" by 11", and all maps must be of the same physical size, scale, and depict the same geographic area. Include major streets and street names on each map. All maps must share a common color scheme.
2. If the FCC rules for any proposed radio service define a minimum radio frequency signal strength level, that level must be shown on the map in a color easily distinguishable from the base paper or transparency layer, and adequately identified by RF level and map color or gradient in the map legend. If no minimum signal level is defined by the FCC rules you must indicate that in the legend of each RF coverage map. You may show other RF signal level(s) on the map so long as they are adequately identified by objective RF level and map color or gradient in the map legend.
3. RF coverage maps with labels such as, "In-Building" "In-Car" and "Outdoor" without corresponding signal strengths in units of "dBm" will be rejected.
4. Where the City of Thousand Oaks determines that one or more submitted maps are inadequate, it reserves the right to require that one or more supplemental maps with greater or different detail be submitted.

7.00: Project Photographs and Photo Simulations

7.01: Where an Applicant proposes to construct or modify a wireless site, the Applicant shall submit pre-project photographs, and photo simulations showing the project after completion of construction, all consistent with the following standards:

1. Minimum size of each photograph and photo simulation must be 8.5" by 11" (portrait or landscape orientation);
2. All elements of the project as proposed by the Applicant must be shown in one or more close-in photo simulations.
3. The overall project as proposed by the Applicant must be shown in five or more area photos and photo simulations. Photos and photo simulation views must, at a minimum, be taken from widely scattered positions separated by an angle of no greater than 72 degrees from any other photo location.
4. For each photograph and photo simulation, show on an area map the location and perspective angle of each photograph and photo simulation in relationship to the Project location.
5. All 'before' and after photos and photo simulations must be of the same scale. For example, do not place a smaller 'before' photo in a box on the same page as a large 'after' photo simulation.

The number of site photos, and photo simulations, and the actual or simulated camera location of these photos and photo simulations are subject to City of Thousand Oaks determination. The Applicant must submit photos and photo simulations consistent with these instructions, and be prepared to provide additional photos and photo simulations should they be requested by the City of Thousand Oaks.
