A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF THOUSAND OAKS ADOPTING STANDARDS AND PROCEDURES AND AUTHORIZING THE COMMUNITY DEVELOPMENT DIRECTOR TO DESIGNATE COMMUNITY EVENT FOR THE PURPOSE OF OBTAINING A TEMPORARY FOOD FACILITY PERMIT FROM THE COUNTY OF VENTURA (**IRC 2013-70503**)

WHEREAS, The Ventura County Environmental Health Division (“Environmental Health”) has authority to issue permits for Temporary Food Facilities, as defined in the California Retail Food Code; and,

WHEREAS, The County of Ventura Environmental Health Division requires that events held on private property where Temporary Food Facilities as defined in the California Health and Safety Code Section 113930 will operate, must first be designated by the City of Thousand Oaks as a “Community Event” as defined in the California Health and Safety Code 113755; and,

WHEREAS, a Temporary Food Facility may only operate at a “Community Event” and may be required to obtain a Health Permit from the County of Ventura Environmental Health Division; and,

WHEREAS, Temporary Food Facilities operated at community events often provide revenue to non-profits serving the community; and,

WHEREAS, Environmental Health allows local jurisdictions to designate events as “Community Events” and will accept such designations in its permitting process; and,

WHEREAS, the City Council desires to assist event organizers to comply with Environmental Health regulations and procedures by providing standards and an efficient process to verify a “Community Event” in accordance with State law in order that Temporary Food Facility permits may issued by Environmental Health; and,

WHEREAS, the Thousand Oaks Municipal Code authorizes the City to impose a fee for providing City services and the City Council has adopted a Master Fee Resolution setting forth those fees.

NOW THEREFORE, the City Council of the City of Thousand Oaks resolves as follows:

1. The Community Development Director, or designee, is hereby authorized to designate a specific event as a Community Event, within the meaning of Section 113755 of the California Health and Safety Code for purposes of compliance with Environmental Health regulations pertaining to Temporary Food Facilities.
2. In order to qualify as a Community Event, the event must be open to the general public, and shall have a civic, political, public or educational nature, as determined by the Community Development Director or designee. For the purposes of this policy, "public" nature shall include, but not be limited to purposes such as providing entertainment to the public, social interaction, and attracting business to the City.
3. The designation of an event as a "Community Event" is separate and independent from the City's Special Event Permit application process, which may also be required for the event and shall be considered on its own merits. Receiving a "Community Event" designation does not obligate the City to approve a Special Event Permit application for the same event.
4. A "Community Event" designation shall be valid only for the location, time period and operational parameters specified in the Community Development Director's designation, which may include designation of a recurring annual event for multiple years, at the Director or designee's discretion.
5. The Community Development Director may revoke a Community Event or Community Event Venue designation upon a finding that the specific event or location does not comply with the policies herein or administrative regulations promulgated by the Director under the authority granted herein.
6. The City's designation of an event as a "Community Event" does not replace or supersede the County of Ventura, Environmental Health Division's separate and independent authority over Temporary Food Facility Permit applications.
7. The Community Development Director is authorized to establish appropriate administrative procedures to consider and decide requests for designation of a Community Event.

8. A new fee number P-68 (Community Event Designation) is hereby established and added to the City's Master Fee Resolution in the amount of \$100.

NOW, THEREFORE, the City Council of the City of Thousand Oaks DOES ORDAIN as follows:

PART 1

(Uncodified)

That Ordinance No. 1548-NS is hereby repealed to the extent inconsistent with this Ordinance, concurrent with the effective date of this Ordinance. For ease of administration, one of the purposes of this Ordinance is to have all the City's wastewater fees, rates, charges, formulas, and related cost recovery matters in one document (or one Ordinance). Most of the wastewater fees, rates, charges, formulas, and related cost recovery matters are restated in this Ordinance and have not been modified or altered from the earlier Ordinance No. 1548-NS, therefore, the respective portions of the facility or capital improvement financial plans, operating expense reports and budgets, future facility needs and cost studies, City Council findings and nexus reports associated with the earlier ordinance are incorporated herein and re-approved by the City Council.

PART 2

(Uncodified)

That the following rates, charges and fees are and shall be set for the City Wastewater Division in accordance with Chapter 1 of Title 10 of the Thousand Oaks Municipal Code as follows:

I. Definitions

A. "Equivalent Residential Unit" (ERU) is a number which represents the discharge to the wastewater system which is equal to that from an average residential unit. One ERU is equal to 20 plumbing fixture units or a discharge of 285 gallons per day having an average strength.

B. "Plumbing Fixture Unit" (PFU) is a number assigned to various physical plumbing appurtenances. The unit count of each fixture type is based on the relation to the amount of waste contributed as determined by the Public Works Director.

C. "Service Unit" (SU) is a number which results from the multiplication of the number of ERU's by adjustment factors for the user group to reflect the strength and volume of the discharge from that user group. The discharge from the average residential user is defined as being equal to one service unit.

D. "Service Unit Rate" is the monthly charge per service unit established by the City Council.

E. "Connection Charge Rate" is the connection charge per service unit established by the City Council.

F. "Connection Charge" is the connection charge rate multiplied by the number of service units.

G. "Strength Factor" (SF) is a number which converts the biochemical oxygen demand (BOD) and suspended solids (SS) of a discharge to a numerical value in proportion to average residential levels (BOD is equal to 200 mg/l and SS is equal to 200 mg/l) for the same variables.

H. "Flow Factor" (FF) is a number which converts the volume of a discharge to a numerical value in proportion to the volume of discharge for an average residential unit.

I. "Wastewater Service Charge" is the monthly charge which is the product of service units and the service unit rate.

J. "Kitchen" is an area equipped with permanent cooking and dish washing facilities for the regular preparation of meals.

K. "Bakery" is a large commercial operation which produces baked goods for wholesale purposes.

L. "Restaurant" is an establishment engaged in the retail sale of prepared food and drinks for on premises or immediate consumption. A "cafeteria" is similar in function and, with the exception of school facilities and non-commercial caterers, shall be deemed the same as a restaurant.

M. "School" is (1) a public or private educational institution with a campus which is dedicated to the instruction of children from kindergarten to twelfth grade, and (2) a public or private college or university with a campus which offers classes with a minimum duration of eight weeks.

N. "Market" is a large commercial operation with two or more of the following: seafood, produce, bakery, meat packaging/processing, or delicatessen.

O. "Condominium" means an estate in real property consisting of an undivided interest in a common portion of a parcel of real property, together with a separate interest in space in a building on such real property. A condominium may include, in addition, a separate interest in other portions of such real property.

For the purposes of this chapter, each separate condominium unit shall be treated as a single residential unit or single commercial/industrial entity in regard to wastewater connection and service charges.

II. In accordance with Section 10-1.701, connection charges shall be determined as follows:

A. Connection Charge. Connection charges shall be based upon the estimated flow, biochemical oxygen demand (BOD) and suspended solids (SS) of the discharge to the wastewater system.

1. Formula for Service Unit Determination

$$SU = (ERU) \times (\text{Strength Factor}) \times (\text{Flow Factor})$$

or

$$(ERU) \times (\text{Combined Factor})$$

SU = Service Unit

ERU = Equivalent Residential Unit

2. Strength & Flow Adjustment Factors for User Groups are as follows:

<u>User Group</u>	<u>Strength Factor</u>	<u>Flow Factor</u>	<u>Combined Factor</u>
a. <u>Residential</u>

c. Industrial

Non-regulated or normal volume discharge	1.0	1.0	1.0
---	-----	-----	-----

d. Regulated industrial waste (as determined by the Public Works Director) or high volume discharge and car washes:

Service Units for this group shall be calculated in accordance with the following formula:

$$SU = \frac{\text{Daily Flow}}{285} [0.60 + \frac{\text{BOD}}{200} \times 0.20 + \frac{\text{SS}}{200} \times 0.20]$$

Daily Flow = Wastewater flow, gpd

BOD = Biochemical Oxygen Demand, mg/l
(minimum = 200 mg/l)

SS = Suspended Solids, mg/l
(minimum = 200 mg/l)

In determining the number of service units for car washes, the calculation should include: (1) car wash discharges, and (2) discharges from other plumbing fixtures on the property.

All dischargers in this group shall be required to separately meter water used which is discharged to the wastewater system. Meter can be public or private. Public meter requires payment of applicable fees.

The daily flow shall be based on data submitted by the user. If actual flow exceeds this estimate by more than 25 percent in any subsequent one year period as determined by metered water usage, the connection charge shall be recomputed and the owner billed for additional charges due as a result of the higher than estimated flows. This provision shall apply to all industrial waste or high volume dischargers and car washes where payment of wastewater connection charges was made on or after July 15, 1988.

Where the use of any discharger's facilities/premises in this group is changed or modified such that the change or modification requires approval by the Community Development Department, then the entire facility/premises shall be subject to the payment of additional connection fees as previously outlined.

e. Alternative factors - The adjustment factors for other user groups shall be as determined by the Public Works Director based on the volume and the strength of the discharge in Paragraph A of this Section. The total volume of water used from public and private sources may be determined by means of public or private meters, installed and maintained at the expense of the user and approved by the Public Works Director.

The formulas noted in a. through d. above are procedures to attempt to accurately estimate flow and waste strength. If the Public Works Director determines that any of the above applied procedures do not accurately represent the flow being discharged to the City sewer system, the Public Works Director may make a determination to correct the flow discrepancy in accordance with established engineering practices.

3. Connection Charge Rate

The connection charge rate per service unit shall be \$10,264.

4. Connection Charge

The actual connection charge shall be determined by multiplying the number of service units by the connection charge rate per service unit.

5. Minimum Number of Plumbing Fixture Units

a. For purposes of connection charge calculations, the equivalent residential units for bakery, market, restaurant and mortuary categories shall be determined by using the actual number of installed fixture units with a minimum of 10 plumbing fixture units.

b. For purposes of connection charge calculations, commercial users with a low volume of wastewater discharge and with 10 or less installed plumbing fixture units shall be assigned one-half (1/2) of a service unit.

c. For purposes of connection charge calculations, all other commercial users shall be charged using the actual number of installed plumbing fixture units, with a minimum of 20 plumbing fixture units.

6. Revisions to Service Unit Calculation

a. If required by the Public Works Director, any non-residential user may be required to submit the test results of an analysis performed by a certified laboratory on a representative 24-hour composite sample of a comparable wastewater discharge. The analysis shall be for BOD, SS and/or any other parameter(s) as may be required by the Public Works Director.

b. In the event a user believes that the strength and/or flow factors assigned are not applicable, said user may have a comparable wastewater discharge analyzed by a certified laboratory. The Public Works Director shall review these results and may make an adjustment to the strength and/or flow factors if the above described submission is judged to be representative of the user's anticipated wastewater strength and flow.

c. All costs to obtain said wastewater analyses shall be arranged and paid for by the user.

B. Common Ownership. The charges set forth in this subsection shall apply, except for those buildings with a total floor area equal to or greater than 25,000 square feet. The provisions of the "Special Situations" subsection of this section shall then apply. Motels, hotels and any other buildings on a parcel of land with a common ownership that cannot at some future date be divided shall be considered on an overall basis, and the minimum charge shall not apply to each individual building. Wastewater matters pertaining to non-residential condominiums shall be overseen by a property owners association. Such connection fees shall be paid at the appropriate commercial rate for a minimum of twenty (20) fixture units within each separate building, and this twenty (20) minimum fixture unit count shall remain in-use or available to the building. Transfer of fixture unit credits exceeding twenty (20) that are not in use may be transferred between non-residential condominium units under the management authority of the property owners association. If additional fixture units must be purchased to accommodate the wastewater disposal needs of a given non-residential condominium, such fixtures shall be purchased by the owner association, considered appurtenant to the parent property of the association and administered accordingly.

C. Escalation. In December of each year, all wastewater connection charges in this Ordinance shall automatically be increased by a factor based upon the change from the preceding July-to-July period in the Engineering News Record (ENR) Construction Cost Index for Los Angeles. The July 2011 ENR Construction Cost Index for Los Angeles was 10062.80 and shall be the basis for future adjustments to the wastewater connection charge.

D. Vested Maps. Development projects with an approved vesting tentative map which had an application deemed complete by the City prior to July 5, 1996 shall pay the indexed wastewater connection charge of \$6,616 per service unit, as adjusted by C above. Development projects with an approved vesting tentative map which had an application deemed complete by the City on or after July 5, 1996 and prior to April 1, 1999 shall pay the indexed wastewater connection charge of \$8,169 per service unit, as adjusted by C above.

E. Special Situations. For special situations such as combined use buildings, multiple occupant developments, high volume discharges or any other facilities where the connection charge computed in accordance with the connection charge subsection of this section does not, in the opinion of the Public Works Director, result in an equitable connection charge, said charge shall be determined based on the best available information and on current professional engineering practices. Such connection charge shall be based on criteria such as (but not limited to): environmental impact, National Pollution Discharge Elimination System requirements, water consumption, peak loading, residential equivalency, treatment plant capacity and capital costs.

F. Credits for prior payment of wastewater connection fees. A parcel of property having paid a connection charge shall be credited with the current

value of the fixture units or equivalent residential units or service units paid. The credit for a paid connection charge shall become appurtenant to the property and may not be conveyed separately or transferred to another parcel of property excepting the aforementioned non-residential condominium practices ("Common Ownership" subsection above).

G. Deferred Payments. The payment of connection charges may be deferred by special agreement for up to six (6) months. Charges which may be deferred include only the connection charge. An interest charge of one and one-half (1-1/2) percent per month simple interest shall be assessed for payment past the six (6) month period.

III. In accordance with Section 10-1.702, special interceptor charges (formerly called "downstream charges") shall be as follows:

A. Special interceptor charges

Single Family Detached	
Unit E Zone	\$370
Unit A Zone	\$915

Condominiums, townhouses, apartments and congregate care and hotel/motel units with kitchens (per dwelling unit), without kitchens (per service unit)	
Unit E Zone	\$370
Unit A Zone	\$915

Commercial, industrial and others (per service unit)	
Unit E Zone	\$370
Unit A Zone	\$915

B. Escalation. In December of each year, all special interceptor charges in this Ordinance shall automatically be increased by City Council action using a factor based upon the percent increase in the ENR Construction Cost Index for Los Angeles from the preceding July-to-July period. The July 2011 ENR Construction Cost Index for Los Angeles was 10062.80 and shall be the basis for future adjustments to the special interceptor charges.

C. Refunds of Previous Payments. Where payments of the special interceptor charge have been made at higher rates prior to the effective date of this Ordinance, refunds shall not be made.

IV. In accordance with Section 10-1.703, monthly wastewater service charges shall be determined as follows:

A. Monthly wastewater service charges shall be based upon the estimated flow, biochemical oxygen demand (BOD) and suspended solids (SS) of the discharge to the wastewater system.

1. Formula for Service Unit Determination

$$\text{SU} = (\text{ERU}) \times (\text{Strength Factor}) \times (\text{Flow Factor})$$

or

$$(\text{ERU}) \times (\text{Combined Factor})$$

SU = Service Unit

ERU = Equivalent Residential Unit

2. Strength & Flow Adjustment Factors for User Groups:

All Others	1.0	1.0	1.0

c. Industrial

Non-regulated or normal volume discharge	1.0	1.0	1.0
--	-----	-----	-----

d. Regulated industrial waste (as determined by the Public Works Director) or high volume discharge and car washes:

Service Units for this group shall be calculated in accordance with the following formula:

$$SU = \frac{\text{Daily Flow}}{285} [0.60 + \frac{\text{BOD}}{200} \times 0.20 + \frac{\text{SS}}{200} \times 0.20]$$

Daily Flow = Wastewater flow, gpd

BOD = Biochemical Oxygen Demand, mg/l
(minimum = 200 mg/l)

SS = Suspended Solids, mg/l (minimum = 200 mg/l)

In determining the number of service units for car washes, the calculation should include: (1) car wash discharges, and (2) the discharge from other plumbing fixtures on the property.

e. Other - The adjustment factors for other user groups shall be as determined by the Public Works Director based on the volume and the strength of the discharge. The total volume of water used from public and private sources may be determined by means of public or private meters, installed and maintained at the expense of the user and approved by the Public Works Director.

The formulas noted in a. through d. above are procedures to attempt to accurately estimate flow and waste strength. If the Public Works Director determines that any of the above applied procedures do not accurately represent the flow being discharged to the City sewer system, the Public Works Director may make a determination to correct the flow discrepancy in accordance with established engineering practices.

3. Service Unit Rate and Wastewater Service Charge

a. The service unit rate shall be \$25.45 per service unit on a monthly basis. The actual wastewater service charge shall be determined by multiplying the number of service units by the service unit rate.

b. For a single-family residence, the monthly wastewater service charge shall be \$25.45.

c. The minimum monthly service charge for a property for which wastewater service is provided shall be equal to the monthly wastewater service charge for a single-family residence.

4. Minimum Number of Plumbing Fixture Units

a. For purposes of service charge calculations, the equivalent residential units for bakery, market, restaurant and mortuary categories shall be determined by using the actual number of installed fixture units with a minimum of 10 plumbing fixture units. For all other categories, the minimum number of plumbing fixture units shall be 20.

5. Revisions to Service Unit Calculation

a. If required by the Public Works Director, any non-residential user may be required to submit the test results of an analysis performed by a certified laboratory on a representative 24-hour composite sample of wastewater originating from said user. The analysis shall be for BOD, SS and/or any other parameter(s) as may be required by the Public Works Director.

b. In the event a user believes that the strength and/or flow factors assigned are not applicable, said user may have the wastewater discharge analyzed by a certified laboratory. The Public Works Director shall review these results and may make an adjustment to the strength and/or flow factors if the above described submission is judged to be a representative sample of the user's wastewater strength and flow.

c. All costs to obtain said wastewater analyses shall be arranged and paid for by the user.

B. Additional Service Charges.

1. Service Charge for Properties Outside City Limits. For wastewater service provided outside City limits, the service charge as determined in Paragraph (A) of this section shall be increased by \$0.45 per service unit.

2. Service Charge Surcharge for Projects With Vesting Tentative Map Applications Deemed Complete. The difference between the indexed connection charge paid by a project with a complete vesting tentative map application and the full connection charge in effect for all other development projects shall be collected from the property owner in the form of a user service surcharge. The City shall collect the surcharge by adding an additional sum to the monthly or bimonthly wastewater service bill for the property. The surcharge shall be collected over a period not to exceed 10 years and shall include an interest payment of 6.5% compounded annually. The amount of the monthly or bimonthly surcharge shall remain the same for the duration of time that the surcharge is collected.

C. Charges for portions of months. A property connected to the wastewater system for a portion of a billing period shall be billed for the portion of the period service is received.

D. Delinquencies. The basic penalty is equal to ten (10%) percent of the unpaid wastewater service charge. An additional penalty, equal to one-half of one percent (0.5%) of the unpaid wastewater service charge and the basic penalty, shall be charged each month, or fraction thereof, that the wastewater service charge and the basic penalty of the previous billing period remain unpaid.

V. In accordance with Section 10-1.706, the overhead rate is included in the approved fully burdened hourly rate.

VI. In accordance with Section 10-1.6, the following pollutant discharge limits shall apply to all users of the wastewater system:

TABLE I

<u>Constituent</u>	<u>Discharge Limits mg/l</u>
Arsenic	1.0
Cadmium	0.8

Commencing December 31, 2008 and terminating December 31, 2018, properties within the Conejo Oaks service area, shall pay \$4.64 per month. This charge shall represent additional infrastructure provided by the City to serve these customers including pressure reduction vaults construction, pipeline installation, pump station abandonment, demolition and site clean-up, and telemetry improvements.

F. Groundwater accounts are not charged a base meter charge as total program costs are collected through the quantity rate.

G. Charges for portions of billing period. A property connected to the water system for a portion of a billing period shall be billed for the portion of the period service is received.

WHEREAS, the City Council has, by previous Resolution, initiated proceedings and declared its intention to annex specified territory and properties to the District designated as "Annexation 2012-2013" (hereafter referred to as the "Annexation Territory"), for Fiscal Year 2012-2013 and to impose on said Annexation Territory an annual levy of assessments for special benefits received from improvements related thereto; and,

WHEREAS, the City Council called and duly held a Public Hearing for the Annexation Territory, and has conducted a property owner protest ballot proceeding for the levy and collection of new assessments for the costs of maintenance, operation and services of the improvements and facilities within the Annexation Territory, in accordance with the provisions of California Constitution Article XIID; and,

WHEREAS, the City Council has declared the results of said property owner protest ballot proceeding regarding the proposed levy and collection of new assessments related to the Annexation Territory including an annual inflationary adjustment; and,

WHEREAS, the levy and collection of assessments so described in the Engineer's Report shall be collected by the County of Ventura for the City of Thousand Oaks; and,

WHEREAS, the City Council and City Attorney have determined that the assessments comply with applicable provisions of the California State Constitution Section XIII D; and,

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2012 and ending June 30, 2013, to pay the costs of maintenance, operation and services of the improvements and facilities within the District related thereto located within public places in the City.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF THOUSAND OAKS DOES HEREBY RESOLVE AS FOLLOWS:

Section 1 The preceding recitals are true and correct.

Section 2 Following notice duly given, the City Council has held a full and fair Public Hearing regarding the annexation of specified territory and properties to the District, the levy and collection of assessments related thereto, the Engineer's Report prepared in connection therewith, and considered the oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 3 Based on public testimony, the facts presented, the results of the property owner protest ballot proceedings, and its review of the Engineer's Report and any amendments, as applicable, a copy of which has been presented to the City Council and has been filed with the City Clerk, the City Council hereby finds and determines that:

- a. The land within the District (including the Annexation Territory) receives special benefit from the operation, maintenance and servicing of landscape and lighting improvements and appurtenances, located in public places within the boundaries of the District; and,
- b. The net amount to be assessed upon the lands within the District (including the Annexation Territory) is apportioned by a formula and method which fairly distributes the net amount among the eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services and said apportionment of fees was approved by the property owners as defined in the Engineer's Report.

Section 4 The Engineer's Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed or as amended by City Council action, and so noted by the minutes of this meeting.

- Section 5 The maintenance, operation and servicing of the improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the proposed improvements to be made, which improvements are briefly described as follows: the maintenance and operation of and the furnishing of services, materials and improvements for public landscaping and lighting facilities, including, but not limited to plants, shrubs, grass, trees and other ornamental vegetation, irrigation systems, drainage systems, fencing, sidewalks, trails and other ornamental structures and facilities, street lights, pedestrian lights, traffic signals and safety lights, and other appurtenant facilities within the public right-of-way.
- Section 6 The County Auditor of the County of Ventura shall enter on the County Assessment Roll opposite each eligible parcel of land the amount of levy so apportioned by the formula and method outlined in the Engineer's Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to Chapter 4, Article 2, Section 22646 of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.
- Section 7 The City Treasurer shall deposit the money representing assessments collected by the County for the District to the credit of a fund designated as the Improvement Fund for the Thousand Oaks Landscape and Lighting Assessment District No. 79-2; and such money shall be expended for the maintenance, operation, improvement and servicing of the landscaping, lighting and appurtenant facilities as described in Section 5 including the administrative and incidental expenses.
