

Effective Container Placement

Here are some hints for locating and labeling recycling containers...

- Put containers in **high-traffic** and **high-use areas**, such as quads, multi-purpose rooms and lunch areas.
- Locate containers **next to trash containers**. This will reduce the temptation to put trash in the recycling container, or vice-versa.
- **Label containers**. Limit text in favor of images. *The CVUSD Recycles program will provide signs for you to use!*
- **Enlist help!** Encourage your students to **monitor containers** and to help their fellow students recycle.
