

## Transportation Planner

***Purpose of the  
role:***

Under direction, performs a range of responsible and varied professional traffic and transportation planning duties in support of various City current and/or long range traffic and transportation planning programs and projects and in the implementation of the City's general plan as well as related policies and regulations; serves as a project manager over assigned projects related to the development and implementation of traffic and transportation programs and projects and related City plans and policies; coordinates assigned programs and projects through the development process including inter-department coordination; and performs related duties as assigned.

***Distinguishing  
Characteristics:***

The Transportation Planner independently performs responsible and varied professional traffic and transportation planning duties in support of assigned functional area including conducting planning research and analysis on moderate to difficult projects, preparing planning studies and reports on short and long- range plans, and in completing assignments and presentations on such programs and projects. Work may include assisting with the instruction or project direction of lower-level professional and paraprofessional staff members. Incumbents are expected to exercise independent judgment in selecting study approach and analytical techniques and in making sound recommendations based on study results.

***Essential Duties  
and  
Responsibilities:***

***The following duties are typical for this classification. Incumbents may not perform all of the listed duties and/or may be required to perform additional or different duties from those set forth below to address business needs and changing business practices.***

- Coordinates and conducts research and studies related to area of assignment; compiles, analyzes, and interprets data to define traffic and transportation conditions, environmental conditions, community needs, zoning problems, and related items; prepares reports and recommendations regarding traffic conditions; land use, zoning, urban design, population trends, transportation, and environmental issues and needs; develops and maintains statistical reporting systems.
- Maintains, updates and analyzes trip generation rates and other data required for the traffic and transportation planning function; participates in the review, development, and/or revision of the various elements of the General Plan, environmental impact reports, plans, ordinances and other policies and procedures.
- Reviews and processes various transportation related plans and applications for subdivisions, housing and commercial developments, variances, use permits, and business licenses; determines and ensures conformity with laws, policies, regulations,

and procedures; recommends approval or identifies problems and assesses alternatives.

- Advises and consults with builders, developers, engineers, contractors, architects, property owners, and the public regarding City development policies, regulations, standards, and procedures with respect to the submission of plans, processing of applications, and implementation requirements.
- As assigned, implements transportation related aspects of the City's environmental policies through preparation of transportation related documents including environmental impact reports and negative declarations for private and public projects in compliance with the California Environmental Quality Act and the National Environmental Policy Act; prepares special studies and projects related to environmental protection.
- Coordinates the preparation of meeting agendas for various commissions, boards and community groups including reviewing draft materials and preparing comments; organizes conferences and work sessions and ensures timely notification of appropriate parties; makes presentations or prepares material for presentation to the City Council, boards, commissions, and community groups as needed.
- Prepares a variety of written communications including staff reports, analytical reports, correspondence and drafts of revisions to local ordinances, planning policies and procedures; prepares maps, graphs, charts and other visual aids to illustrate planning studies.
- As project manager, coordinates planning activities with other City departments and with outside agencies.
- Makes field surveys and investigations related to traffic and transportation planning, projects and programs; develops and prepares material for pamphlets, brochures and publications.
- Presents traffic and transportation planning matters to the City Council, Traffic and Transportation Advisory Commission, Bicycle Advisory Committee and citizen committees.
- Coordinates the preparation of Master Plans including but not limited to Bicycle Facilities Master Plan, Active Transportation Master Plan, Complete Streets Plan and Safe Routes to School Plans.
- Coordinates the preparation of studies including but not limited to Traffic Mitigation Nexus Fee Study, Circulation Element Study, developer traffic impact studies and parking studies.
- Prepares grant applications for funding related to bicycle, pedestrian and traffic/transportation improvement projects.
- May instruct others in work procedures; may provide direction to others on a project basis.

Performs related duties as required.

*The following generally describes the knowledge and ability required to enter the job and/or be learned within a short period of time in order to successfully perform the assigned duties.*

Knowledge of:

- Objectives, principles, procedures, standards, practices and information sources related to traffic and transportation planning.
- Objectives, principles, procedures, standards, practices and information sources in the field of traffic and transportation planning including bicycle and pedestrian planning.
