NOTES:

- 1) 240 Volts x Amps = **Watts** (VA) Watts / 240 Volts = **Amps**
- 2) This schedule is based on the National Electrical Code (a.k.a. the California Electric Code) and is intended as a guide for preparing electrical load calculations. However, due to various conditions that exist on individual projects, this format may not meet code requirements for your project. If you have any questions regarding the use of this form, or electrical load calculations, the Building Division Senior Electrical Inspector can provide assistance upon request.
